

Seagull project

Table of contents

1 Hosting on Sourceforge.....	2
2 Source code.....	2
3 Mailing lists.....	2

1. Hosting on Sourceforge

Seagull is hosted on [Sourceforge](http://www.sourceforge.net/) (http://www.sourceforge.net/). Additional information like statistics on Seagull can be found from the [Seagull's Sourceforge project web page](http://www.sourceforge.net/projects/gull/) (http://www.sourceforge.net/projects/gull/).

2. Source code

Seagull source code is Open Source, released under the terms of the GNU GPL license. Feel free to download it, look at it and, why not, enhance Seagull, fix bugs and send your contributions back to the user community!

- Browse Seagull [source code in SVN](http://sourceforge.net/svn/?group_id=163830) (http://sourceforge.net/svn/?group_id=163830).
- Getting a copy of the latest source code:

```
svn export https://svn.sourceforge.net/svnroot/gull/seagull/trunk/src seagull.svn
```
- Getting a copy with SVN information (can be later updated by running "svn update") of the latest source code:

```
svn co https://svn.sourceforge.net/svnroot/gull/seagull/trunk/src seagull.svn
```

3. Mailing lists

Several mailing lists are available, so that you can get the latest news on the project or ask your questions:

- [Seagull users](http://lists.sourceforge.net/mailman/listinfo/gull-users) (http://lists.sourceforge.net/mailman/listinfo/gull-users) : where Seagull users meet and are asking for help.
- [Seagull commits](http://lists.sourceforge.net/mailman/listinfo/gull-commit) (http://lists.sourceforge.net/mailman/listinfo/gull-commit) : get a notification each time the source code changes!
